OBJECTIVE

To leverage my skills in a challenging role that contributes to the success of the organization.

EDUCATION

BE-Electronics and Communication Engineering, Tirunelveli.	CGPA-7.6
HSC-Municipal girls higher secondary school, Tirunelveli.	Percentage-80
SSLC-Municipal girls higher secondary school, Tirunelveli.	Percentage- 76

SKILLS

Technical Skills

Programming Languages: C, C++ , Embedded C, HTML, CSS

Soft Skills

Time Management, Teamwork

PROJECT

Brain stroke prediction using cnn

Developed an AI-based system to detect brain stroke from CT/MRI images using Convolutional Neural Networks (CNN). Implemented pre-processing, model training, and prediction modules for accurate classification of stroke and normal cases.

Smart home automation system

Designed and developed a smart home automation system using microcontroller Controlling lighting, temperature, and security systems remotely.

Soil Moisture Indicator using LED or BUZZER

Designed and developed a project develops an automatic soil moisture monitoring system to improve plant health and watering convenience

Simple Animation video-Built using Html and CSS

The objective of the project is to create a simple animation video using html and css. The animation will showcase a series of visuals that demonstrate a concept.

INTERNSHIP

- Attended a two week internship program on python in AB technology.
- Attended an implant program for a period of five days in BSNL.

CO-CURRICULAR ACTIVITE

- Presented a paper on the topic of “Mouse pointer automation” in PSN college of engineering.
- Participated in the workshop title “Sensor interfacing with ARM 7 processor” organized by National engineering college.
